SUMMARY

Full-Stack Developer and Data Analyst experienced in building and deploying scalable web applications using modern technologies. Strong problem-solving skills, adaptable mindset, and committed to continuous learning, with growing expertise in DevOps practices and cloud technologies.

EDUCATION

M.sc, Decision and Computing Sciences,
Coimbatore Institute of Technology
CGPA: 9.156 (Upto 5th semester)

2023 – 2028 | Coimbatore, India

SKILLS

Programming Languages: Python, SQL, Java, C | **Frontend:** React, Angular | **Backend:** Node.js, Express.js, REST APIs | **Database:** MongoDB (Atlas), Firestore | **AI & Data Science:** EDA, Statistical Analysis, Machine Learning, Deep Learning(CNNs, Image Classification), LangChain, RAG | **Cloud & Tools:** GCP, GitHub, Jenkins, Power BI | **Core CS:** DSA, OOP, DBMS, Operating Systems(Basics) | **Professional Skills:** Problem Solving, Analytical Thinking, Research Mindset

AREAS OF INTEREST

Full-Stack Development | Mobile Application Development | Data Science | Artificial Intelligence | Generative AI

PROJECTS

Blood Bank Management System (MERN Stack)  , 08/2025 – 11/2025

Tools used: React, CSS, MongoDB Atlas, REST APIs, Nodemailer

- Built a MERN based blood bank platform, connecting **50+ donors**, **5 hospitals**, and **3 admin roles**, improving **real-time blood availability tracking** and **request management**.
- Implemented **secure authentication** and **role-based access** for **60+ users**, with automated notifications, improving timely communication and record accuracy by over **90%**.

Smart Jouney Safety App (Android Application)  ,

12/2025 – 02/2026

Tools Used: Java, Firestore, Location API, SMS API, Speech Recognition API

- Developed a **real-time journey safety** Android application that automatically shares live location **via SMS every 2 minutes** to selected emergency contacts, enabling continuous travel monitoring.
- Implemented **SOS alerts**, safe-arrival notifications, and **voice-triggered emergency detection** (using NLP), improving rapid emergency communication and enhancing user safety during travel.

Phishing URL Detection System  , Tools Used: XGBoost, scikit-learn

02/2025 – 04/2025

- Trained an XGBoost classifier on **10,000 URLs** using **20** engineered features, achieving **86.6% test accuracy** using **5-fold cross-validation**.
- Delivered strong classification performance with an **F1-score of 0.868**, accurately detecting phishing and legitimate URLs.

ROLES AND RESPONSIBILITIES

Editing Head, 403 Strats Club - Coimbatore Institute of Technology

06/2025 – Present

- Designed **25+** event creatives using a data-driven approach, boosting social media reach by **30%**.

ACHIEVEMENTS

Google Cloud Platform (GCP) 

Completed **19 Skill Badges**, covering cloud fundamentals, data and compute services

LeetCode 50-Days Badge 

Solved problems consistently for **100+ days**, including SQL and algorithm challenges

Research and Publication  , *IJRTI*

Co-authored research on Phishing URL detector using XGBoost achieving 86.6%accuracy on 10,000 URLs.

CERTIFICATIONS

JPMORGAN CHASE & CO.  — Software Engineering Job Simulation

Oracle  — Database Fundamentals

Trainity  — Data Analytics Virtual Internship (3 Months)

Accenture  — Data Analytics and Visualization Job Simulation

IBM SkillsBuild  — Cloud Computing
